

December 6, 1960

Dr. Peter H. A. Sneath  
National Institute for Medical Research  
London N.W. 7  
England

Dear Peter:

Enclosed is a thermofax of the proof of our paper as returned to the Proceedings. Please let me know if you see any blatant errors that can still be corrected. We have ordered 150 reprints to be shipped directly to you when ready.

Also a copy of a letter to Dartmouth that should be self explanatory. If you are interested in these samples, I hope you will communicate directly at your early convenience as I have been holding them off for almost two months now. I have no further information than appears prima facie and I hope you will be able to keep me informed of further developments.

Yours cordially,

Joshua Lederberg  
Professor of Genetics
